### Simple Strategies for RF Management with 802.11n

Available from 13-JAN-2009 to 13-JUL-2009

#### [Register](#)

Need Help? Report problems or request assistance: [Help Desk](#).

#### Industry

Large Corporations  
Mid Size / Enterprise Business

#### Who Should Attend

Technical decision makers who are seeking to deploy a wireless network, upgrade their wireless network, or pervasively deploy their wireless network.

#### Details

##### Simple Strategies for RF Management with 802.11n

##### Live Video Webcast

**Tuesday, January 13, 10–11 a.m. Pacific Time**

In this episode we'll discuss how migrating to an 802.11n network is easier than ever. Upgrading your network to 802.11n technology is six times faster than existing wireless networks. Learn about how you can easily deploy a network with increased reliability and predictability along with consistent coverage and backward compatibility in supporting 802.11a/b/g.

To empower your workforce, optimize your network with the enterprise-grade technology it will need to increase productivity. By deploying 802.11n, your IT team is also provided with a future-proof system that has the interoperability to incorporate next-generation technologies when the time comes.

#### Includes Live Q&A

Our 802.11n experts will also be available to answer your mobility and wireless questions throughout the broadcast.

#### Agenda

Topics include:

- Introduction and key advantages of 802.11n
- New tools for simplifying wireless management
- Key planning and deployment recommendations, including RF planning and design
- Best practices for optimizing capacity and coverage and improving client connections
