See and believe.

Discovery™ PET/CT 600 - The power to do more.

Discover innovative ways to detect disease earlier, outline effective treatment plans, and efficiently monitor treatment - all focused on treating patients with confidence.

Today, the boundaries of PET/CT imaging technology expand with the addition of an innovative PET/CT platform that offers more power and capabilities for disease management. As we introduce the new PET/CT, we are striving to offer applications, flexibility and processing power to achieve both your clinical and research goals.

Together, it is a future both you and your patients can see and believe.
