Discovery™ PET/CT 600

See your potential

See the potential. **Believe** in your future.

The PET and CT event detection and processing chain is a sophisticated balance of many evolving technologies. Built with the future in mind, the Discovery PET/CT 600 will help position your facility for future growth.

With one of the largest installed bases, over 1,000 units, and a commitment to the Continuum™ upgrade program, you can be confident your investment provides the latest PET/CT technologies to your organization.

By combining an understanding of biological disease processes with our imaging technology and molecular pharmaceuticals, GE Healthcare is proud to work with you in providing innovative tools to physicians and researchers...and new hope for patients.
