Emerging Wireless LAN Standards and Trends

**Live Video Webcast, Tuesday, February 10, 2009
10–11 a.m. Pacific Time**

Dear NAME,

Take the necessary steps to improve the performance and operations of your wireless LAN—for now and in the future. Mobility TV will explore emerging standards and future trends that will affect your WLAN.

Join us for an educational webcast on February 10 to hear about ways to future-proof your WLAN by understanding future trends. You will learn about new industry standards and trends in wireless networking and how these changes will affect your ability to deploy a reliable and scalable wireless network. Technical experts will be available to answer your questions for meeting these future challenges.

Learn about such important topics as:

- Evolution of industry standards, including emerging standards such as 802.11k and 802.11r
- How your network will be affected by future industry trends
- Tips for future-proofing your network

Includes Live Q&A

Don't miss the opportunity to have your 802.11 questions answered. Experts will be available by chat throughout this video webcast.

Sincerely,
Cisco
