# Cisco Next-Generation Wireless offers secure performance with reliability

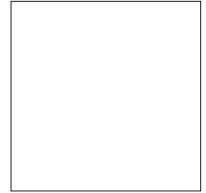

Business has gone mobile, and Cisco delivers a mobility experience through next-generation wireless solutions. Cisco® Next-Generation Wireless networks with 802.11n provide up to five times the throughput of current 802.11a/b/g networks and enhanced reliability and predictability to deliver mission-critical apps every time. Discover how <PARTNER NAME> and Cisco can help you:

- Deploy tools and high-bandwidth apps such as wireless voice and video
- Support diversity in devices and guarantee past and future compatibility
- Empower teams to work anywhere without sacrificing security or performance

<Partner Name> can help you cost-effectively implement a Cisco Unified Wireless Network with next generation wireless technology today so you can have a secure, scalable, and pervasive wireless network.

Visit <URL> or call <Partner Phone Number> to discover how <PARTNER NAME> and Cisco can help your business elevate your productivity, efficiency, and customer satisfaction.
