

The Power of Pervasive Mobility
Enhance learning, campus operations and mobile
applications with Cisco® Next-Generation Wireless

Partner Logo Here

Cisco Next-Generation Wireless offers secure reliability with performance

Keep education in motion with Cisco's high-speed, high-performance wireless solution. Cisco's next-generation wireless networks provide up to five times the throughput and enhanced reliability and predictability of existing networks. With wireless performance approaching that of wired networks, learning and business applications are delivered to the right device, in the right place, at the right time.

Discover how Cisco and <PARTNER NAME> can help you:

- Empower mobile learning with video, voice, and multimedia
- Deliver reliable and predictable mobility to high-density areas
- Extend security with wireless video surveillance cameras across campus

<Partner Name> can help you cost-effectively implement a Cisco Unified Wireless Network with next-generation wireless technology today so you can have a secure, scalable, and pervasive wireless network.

Visit <URL> or call <Partner Phone Number> to see how <PARTNER NAME> and Cisco can help your educational institution deliver pervasive, reliable, high-speed wireless connections from any location.
