## Embrace the Power of Next-Generation Wireless

Enhance collaboration and workflow with Cisco Mobility Solutions for healthcare

### Dear Valued Customer,

Healthcare workers depend on a variety of devices and apps to access patient-care information. Cisco® Mobility Solutions for healthcare are designed with this in mind to help improve healthcare delivery by providing secure wireless, mobile collaborative care and context-aware services. The Cisco Next-Generation Wireless solution allows healthcare organizations to control costs, streamline processes and operate more efficiently. Healthcare organizations migrating to Cisco Mobility Solutions will realize they can:

- Access secure e-health records, decision support, e-prescribing and e-research
- Meet regulatory compliance (HIPPA, PCI) and ensure patient privacy
- Provide the wireless foundation for additional mobile collaborative-care apps

<Partner Name> offers Cisco's Next-Generation solution to help healthcare organizations meet the increasing demands for pervasive wireless connectivity while supporting a breadth of mobile applications over a diverse array of devices. With Cisco Mobility Solutions, clinicians and staff can streamline communications, increase workflow productivity and enhance patient experience, while maintaining a low total cost of ownership.

Visit <URL> Cisco Next-Generation Wireless website or call <Partner Phone Number> for a free consultation on your company's mobility strategy or to receive a customized report on best practices for designing next generation wireless networks for healthcare.
