## Cisco Next-Generation Wireless offers secure reliability with performance

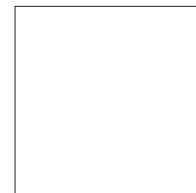

As a mobile clinician or caregiver you need your healthcare facilities to stay connected, communicating and collaborating to deliver the best patient care. Cisco Mobility Solutions are delivering a true business-mobility experience with a wireless solution that rivals wired networks, allowing healthcare organizations to focus on care, treatment, and support of patients.

Discover how Cisco and <PARTNER NAME> can help you:

- Collaborate among mobile clinicians for faster, more-informed decisions
- Quickly find medical equipment and staff to streamline workflow
- Ensure patient privacy with highly secure information access and exchange

<Partner Name> can help you cost-effectively implement a Cisco Unified Wireless Network with next generation wireless technology today so you can have a secure, scalable, and pervasive wireless network.
