

The Power of Pervasive Mobility
Empower the next wave of mobile applications
with Cisco® Next-Generation Wireless

Partner Logo Here

Cisco Next-Generation Wireless offers secure reliability with performance

Leading retailers realize the importance of their wireless networks, and Cisco is delivering business mobility through a high-performance, next-generation wireless solution. Cisco's 802.11n networks provide up to five times the throughput with enhanced reliability and predictability so retailers can deploy tools and high-bandwidth applications, such as wireless voice and video, to the right device, in the right place, at the right time.

Discover how Cisco and <PARTNER NAME> can help you:

- Provide reliable wireless access to apps in challenging RF environments
- Support device diversity and help ensure past and future compatibility
- Empower sales associates to service customers at the moment of choice

<Partner Name> can help you cost-effectively implement a Cisco Unified Wireless Network with next generation wireless technology today so you can have a secure, scalable, and pervasive wireless network.

Visit <URL> or call <Partner Phone Number> to discover how <PARTNER NAME> and Cisco can help your business provide pervasive wireless with reliable connections from any location.
