Industry

Large Corporations

Who Should Attend

Technical professionals who want to learn how to provide convenient wireless access that is secure and easy to manage.

Details

Protecting Your Network with Integrated Wireless Intrusion Prevention (Live Video Webcast, October 14, 2008)

In this special episode we'll discuss best practices for safeguarding your information by effectively securing your wireless network.

We'll examine the Cisco Adaptive Wireless Intrusion Prevention System (wIPS), which offers advanced threat detection and classification capabilities. Designed to protect against the ever-changing threats to today's networks, the wIPS can be integrated into your existing wireless network for operational simplicity and cost effectiveness. In this session we will discuss how to best achieve a comprehensive and unified strategy for wired and wireless intrusion prevention using Cisco Adaptive wIPS.

In this security-focused webcast, we will talk about:

- Emerging wireless threats and how to protect against them
- Developing a strategy for wired and wireless intrusion prevention
- Best practices for design and deployment
- Achieving cost-effective regulatory compliance

Online Panel Discussion

Join Cisco technical experts Chris Kozup and Scott Pope in a discussion on achieving secure business mobility.

Agenda

Topics include:

- Context-aware mobility
- Unified Client Administration Manager
- Advanced threat mitigation
- Mobile, intelligent roaming
- Adaptive Wireless IPS
- Multiple operating systems for multiple devices
