Protecting your Network with Integrated Wireless Intrusion Prevention

**Live Video Webcast, Tuesday, October 14, 2008
10–11 a.m. Pacific Time**

Dear NAME,

Don't miss the next Mobility TV episode where you will hear proven methods on how to secure your enterprise wireless network from outside threats.

Interact with our experts and learn best practices for safeguarding your information by effectively securing your wireless network. Hear about emerging wireless specific threats and learn how to repel risks while conserving IT resources. Find out how you can easily address these challenges by deploying the Cisco Adaptive Wireless Intrusion Prevention System (wIPS). You'll also hear why the current state of wireless security demands a comprehensive and unified strategy for wired and wireless intrusion prevention.

Cisco technical experts will address such security issues as:

- Emerging wireless threats and how to protect against them
- Developing strategy for wired and wireless intrusion prevention
- Best practices for design and deployment
- Achieving cost-effective regulatory compliance

Online Panel Discussion plus Live Q&A

[Register now](#) and join Cisco technical experts in a discussion on achieving true business mobility in the most secure way possible. Experts will also be available to answer your questions throughout this video webcast.

Sincerely,
Cisco
