Acne Repair Kit

Drying Lotion

Dry up whiteheads and surface pimples overnight with this effective, fast-acting potion. A few drops of our world-famous Drying Lotion before bed will speed healing and reduce the spreading of acne eruptions. Will not irritate or dry surrounding skin.

To use: DO NOT SHAKE SOLUTION. Dip a cotton swab into pink sediment. Dab on pimple and let dry overnight. Wash off solution in the morning.

Drying Cream

Sulfur-based acne treatment manages to disinfect and dry up small underground blemishes. This concentrated formula is rich in Aloe Vera to help heal and conceal erupted pimples on oilier areas of the face. May be used morning or night for effective results.

To use: Apply a small amount on erupted areas, day or night. Can be used under make-up to conceal existing blemishes.

Buffering Lotion

Keep severe cystic flare-ups at bay with our most aggressive acne treatment. This highly concentrated formula is made with acne-fighting and skin-healing ingredients like Sulfur and Allantoin for fast and noticeable results after only 2-3 applications.

To use: After cleansing and toning, apply lotion to all erupted areas. Use every other evening. Best when used before and after Drying Mask. SHAKE WELL.
